

# NATIVE

Plants native to our region of the Pacific Northwest. This is a list of the natives we commonly carry. Cultivars of these plants (the name listed in '...' marks at the end of the Latin name), are forms of natives that are selected for a noticeable trait, such as a narrower growth habit, better disease resistance, more freely flowering, and so forth.

Vine Maple (*Acer circinatum*)

**Maidenhair Fern (*Adiantum pedatum/aleuticum*)**

Serviceberry (*Amelanchier alnifolia*)

**Kinnikinnick (*Arctostaphylos uva-ursi*)**

Deer Fern (*Blechnum spicant*)
