- ANGELA:** Large, glossy black fruit.
Firm, dark red flesh. Good flavor. Vigorous, heavy producer.
Ripens mid July. Good crack resistance.
Pollinate with any other cherry on this list.
- BING:** Large, heart-shaped, dark reddish-purple skin.
Firm and meaty fruit with purple flecks.
Ripens mid June to early July. Somewhat susceptible to cracking.
Pollinate with any other cherry on this list.
- LAPINS:** Large, firm, black fruit with rich flavor. Crack resistant.
Heavy producer. Ripens late July.
Self-fertile. Good pollinator for other sweet cherries.
- MONTMORENCY:** The standard for pie cherries. Great for freezing and canning
Medium large, bright red fruit with firm yellow flesh. Tart, tangy flavor.
Ripens late June.
Self-fertile, good pollinator for other cherries.
- RAINIER:** Large yellow fruit with a red blush. Fruit is firm and sweet.
Very productive and vigorous. Crack resistant.
Ripens mid-season.
Pollinate with any other cherry on this list.
- SUREFIRE:** Fire engine red skin and flesh. High sugar content, ok for fresh eating.
Large, crack resistant crops. Sour cherry.
Ripens late June early July.
Self-fertile, good pollinator for other cherries.
