FILBERTS

DELTA: Immune to Eastern Filbert Blight.
Medium sized, tasty nuts, bears large crops.
Pollinate with Yamhill.

YAMHILL: Immune to Eastern Filbert Blight. Smaller, more compact tree.
Small to medium size nuts, quite productive.
Very good texture and flavor.
Pollinate with Delta.

WALNUTS

English

CHAMPION: Medium-large nuts. Good quality and stores well. Rich, flavorful nuts.
Very productive tree; starts bearing in 6 to 7 years. Reaches about 30 feet.
Ripens in early October. Easy to crack, thin shells.
Self-fertile, but produces heavier crops when pollinated with another walnut.

LAKE: Thin shelled, medium to large nuts with excellent, nutty flavor.
Productive tree to about 30 feet tall. Bears in 4 to 5 years.
Easy to crack, thin shells.
Self-fertile, but produces heavier crops when pollinated with another walnut.

NORTHERN PRIZE: Rich flavor. Abundant, tasty nuts.
Bears in 5 to 6 years.
Vigorous tree grows to about 20 feet tall.
Ripens in late September.
Self-fertile, but produces heavier crops when pollinated with another walnut.

Black

KWIK KROP: Light colored, mild flavored nuts. Good production.
Bears in 2 to 3 years. Very easy to shell.
Ripens in October. Nice shade tree, reaching 40 to 50 feet.
Self-fertile.
Locate trees carefully, as they can prohibit the growth of some other plants in the immediate vicinity; and they should not be planted near horse stables or pastures.
